Communicating Economics: Webpage Design Project

Explain a macroeconomic idea clearly through a public-facing webpage.

⭐ Purpose (Why We're Doing This)

This assignment strengthens your ability to explain an economic concept clearly for a real-world audience. You will translate a macroeconomic idea into a simple, accessible webpage that could help a non-economist understand the topic.

You will practice:

- Plain-language communication
- Digital content creation
- Organizing economic ideas clearly
- Teaching others through simplified examples

This project prepares you for your **Final Business Economic Briefing** by helping you communicate economic concepts with clarity and purpose.

🧠 Task (Step-by-Step Instructions)

1. **Choose one macroeconomic concept** (GDP, inflation, unemployment, business cycles, AD–AS, fiscal policy, monetary policy, or global trade).
2. **Choose a target audience** (first-year student, family member, small business owner, etc.).
3. **Draft your content** in a Google/Word doc:
   - Title
   - Short introduction (2–3 sentences)
   - 2–3 key idea sections
   - A real-life example
   - A brief "why this matters" takeaway
4. **Create your webpage in Lovable:**

- Add your headings and text
- Use short paragraphs, bullets, and white space
- Add a simple visual if appropriate

5. **Publish your page** and copy the shareable link.
6. **Submit in Canvas:**
   - Your webpage link
   - A copy of your text (Word or PDF)
   - A short reflection (5–7 sentences) about your audience, decisions, and clarity

🎯 Criteria for Success

- **Economic Accuracy (35%)** — Concept is explained correctly and logically.
- **Clarity & Accessibility (30%)** — Written for a non-economist using plain language.
- **Page Organization & Design (20%)** — Clean layout, readable structure, logical flow.
- **Reflection & Professionalism (15%)** — Thoughtful reflection and complete submission.

⏱ Estimated Time to Complete

- Drafting content: 45–60 minutes
- Building Lovable page: 45–60 minutes
- Reflection: 10–15 minutes

Total: 1.75–2.5 hours

⚠ Common Mistakes to Avoid

- Using jargon without explanation
- Copying textbook language instead of simplifying
- Dense paragraphs with no headings
- Forgetting the real-life example
